Honorary Doctor of Letters

Dr. Harold A. Adams

Widely considered to be a pioneer in the area of collaboration among the built environment professions and credited with numerous innovations in architecture now considered best practice among the world’s leading international design firms, Harold A. Adams has had a profound and lasting impact on the fields of architecture, planning, design and construction.

Mr. Adams began his distinguished architectural career as a graduate of Texas A&M University in 1962, rising from humble rural Texas roots to eventually work directly with Presidents and leaders of state around the world. He developed a close working relationship with President and Mrs. Kennedy on numerous White House projects in the early 1960s. This association continued after the president’s death and included the supervisory role at the Kennedy Memorial Arlington National Cemetery and the JFK Presidential Library in Boston.

His direct involvement with our nation’s Capitol, was sustained through the initial proposals for a capitol visitors’ center. Across eight presidential administrations and nineteen House of Representatives sessions, the project which began development in the late 1960s, was inaugurated in 2008. Today the Capitol Visitor Center welcomes the world to the United States, hosting millions of people each year.

In 1967 Mr. Adams joined RTKL, a Baltimore firm of architects, and helped to grow the firm into a global multi-disciplinary, award winning organization with more than one thousand employees and sixteen offices around the world. He served as President, CEO and later Chairman of RTKL, whose notable projects include Oriole Park at Camden Yards, The Shanghai Science and Technology Museum and rebuilding the Pentagon after the attacks of September 11, 2001.

Holder of numerous awards and accolades, including Fellow of the American Institute of Architecture, from which he also received the Kemper Award, Mr. Adams also belongs to the Royal Institute of British Architects and is one of the first Americans to hold a first-class Kenchikushiki license with Japan’s Ministry of Construction. He was inducted in the National Academy of Construction in 2011.

Today, Mr. Adams has turned his attention and considerable abilities towards education. He has given freely of his time, serving as a lecturer, mentor and trusted colleague. As a Fellow of the Texas A&M Hagler Institute for Advanced Study, he shares his knowledge in management of global creative enterprises and integration of knowledge-performance based approaches in architectural practice.
Honorary Doctor of Letters

His Excellency Mohammed bin Saleh Abdulla Al Sada

Born and raised in the small rural town of Ruwais, Qatar, known for fishing and pearl diving, Dr. Al Sada rose to a distinguished career as a respected global leader for energy, engineering and education.

Following his childhood in Qatar he graduated from Qatar University with a bachelor’s degree in Marine Science and Geology. Later he received both a master’s and a doctoral degree in Corrosion Science and Engineering from the University of Manchester Institute for Science and Technology.

He began a career with Qatar Petroleum in 1983 and would go on to lead numerous of the company’s divisions and subsidiaries, eventually appointed as Technical Director, overseeing the major oil and gas infrastructure projects which enabled Qatar’s rapid development as a global energy provider.

He is a recipient of numerous awards and recognitions as an engineer and innovator for oil and gas industry, construction, global energy policy, and energy markets. He has served in a variety of leadership positions for Qatar and the region, including membership on the Board of Directors of the Qatar Foundation, Supreme Education Council, and in 2016, he served as President for the Organization of the Petroleum Exporting Countries (OPEC).

In 2007, he was named Minister of State for Energy and Industrial Affairs and subsequently Minister of Energy and Industry in 2011, where he not only helped direct the economic transformation of Qatar and the world’s energy markets, but advanced the social development of his home country through education.

An advocate for education at every level, Dr. Al Sada has mentored young people, supported development of primary and secondary education policy and practice, and advocated for teachers through nonprofits such as Teach for Qatar. He serves on the Board of Trustees for College of the North Atlantic in Qatar.

Dr. Al Sada has been a consummate supporter of Texas A&M University’s Qatar Campus since its earliest inception of partnership with the Qatar Foundation and the renowned Education City initiative, now known as home to several leading universities and research institutes.

Serving as Chairman of the Texas A&M University at Qatar Joint Advisory Board, he is instrumental in the branch campus’s emergence as the premier provider of engineering education in the region.
Candidates for Commissions in
The Armed Forces of the United States
Brigadier General Joe E. Ramirez, Jr. (Ret.)—Commandant

Honors Fellows

Students graduating with Honors Fellows must have completed at least 30 hours of Honors course credit, including 9 hours in the University Core Curriculum and 12 hours in 300-400 level courses. Additionally, all Honors Fellows have completed a capstone project. Honors Fellows are required to remain active with the Honors Student Council and make an annual update to their ePortfolios. Students must maintain at least a 3.5 cumulative Grade Point Average with at least a 3.25 Grade Point Average in Honors coursework.

Latin Honors

Students graduating with Latin honors distinctions have enrolled in and successfully completed a minimum of 60 undergraduate semester hours required for the baccalaureate degree. The category of Latin honors attained is determined by grade point average of all college hours attempted, excluding transfer hours. The categories are as follows:

*Cum Laude*: A student may be graduated *Cum Laude* with a Grade Point Average of 3.50 to 3.699.

*Magna Cum Laude*: A student may be graduated *Magna Cum Laude* with a Grade Point Average of 3.70 to 3.899.

*Summa Cum Laude*: A student may be graduated *Summa Cum Laude* with a Grade Point Average of 3.90 or above.

Honors Stoles

Texas A&M undergraduates who complete the requirements for any of the distinctions listed above or for college- and departmental-level honors programs are awarded a gold satin stole to wear with their commencement robes. The university presents the stoles to honors graduates in recognition of their accomplishments.
Undergraduate Research Scholars

The Undergraduate Research Scholars program provides motivated undergraduates the opportunity to engage in quality, in-depth research experiences. Over two semesters Scholars work with faculty mentors to produce a formal undergraduate research thesis and a public presentation of their research results.

Academic Regalia

Academic institutions throughout the world have created a wide variety of customs including distinctive dress, color and ceremony to indicate the accomplishments of scholars. English traditions originating at Oxford and Cambridge led to the development of American academic regalia. By the twentieth century, institutions of higher learning in the United States had adopted a well-defined code of academic costume, which now includes the identification of the different academic degrees by distinctive gowns, hoods and colors. For instance, the baccalaureate gown is worn closed and is identified by long, pleated front panels and long, pointed sleeves. The master’s gown has very long sleeves, closed at the bottom, and the arms of the wearer are placed through an opening in the front of the sleeves. Doctoral gowns are distinguished by velvet panels around the neck and down the front of the gown. Three horizontal black velvet bars also mark the doctorate. In America, the hood is the most colorful feature of academic regalia. The bachelor’s hood, when worn, is comparatively short; the master’s, a bit longer; and the doctor’s, at four feet, reaches far down the wearer’s back. The outside of the hood is black and is bordered with a two-, three- or five-inch band of velvet in the color representing the degree received, and the hood is lined with the colors of the granting institution. For instance, the Master of Arts hood from Texas A&M has a white border, for the discipline color of Arts, Letters and Humanities, with a maroon and white lining; the Master of Science hood has a golden yellow border, for Science, with a maroon and white lining; and the Doctor of Philosophy hood has a border in the blue of Philosophy with a maroon and white lining. Among the other discipline colors are Agriculture—maize, Architecture—violet, Business—olive green, Education—light blue, Engineering—orange and Veterinary Medicine—gray. These colors represent the degree earned, not the academic major. The Ph.D. in Engineering, for example, would normally wear the dark blue of Philosophy on the hood and gown instead of the orange of Engineering. Official guests of the University and members of the Board of Regents wear the doctor’s gown with the blue of Philosophy on the front and hood.
**Ceremonial Mace**

The University mace, a gift of the Class of 1990, leads the academic procession at commencement and on other special ceremonial occasions. Historically, the use of a mace dates back to the Middle Ages and was carried before or placed near a magistrate or other dignitary as an ensign of authority. This mace is made of sterling silver, walnut and oak and depicts various University symbols. It was designed by Rodney Hill, Texas A&M architecture professor who also carved the staff. Silversmith Lane Coulter ’78, of Santa Fe, prepared the silver head of the mace and Lars Stanley ’74, of Austin, designed and manufactured the stand.

**Gonfalons**

The gonfalon, a flag that hangs from a crosspiece or frame, originated in the medieval republics of Italy as an ensign of state or office. Gonfalons have been adopted in many universities around the world as college or institutional insignias. The gonfalons displayed represent the colleges of Texas A&M University. The colors of the University, maroon and white, are joined together in a pattern common to all of the flags. The top portion is the designated color for each unit. The white field serves as a background for the symbol of each.

**College of Agriculture and Life Sciences.** On a ground of white appears an emerging sun of yellow and russet rays. Yellow, the discipline color of science, russet, the discipline color of natural resources, and the center orange, color of engineering, combine to illustrate the intellectual interest in human and biological systems and structures. The interweaving ring encompasses the dawn making a full circle of life.

**College of Architecture.** The inner triangle represents the essential insight of the social, economic, and political forces that shape our environment. The surrounding pyramid is an ancient symbol of the creative intellect. The interweaving bands of white below the pyramid form the necessary interaction of science and art.

**Mays Business School.** The golden knot symbolizes unity and coordination of the disciplines of business administration. Surrounding the golden knot, a field of purple represents the rank of authority. The foundation of lozenges under the triangle illustrates the flow of order.

**College of Education and Human Development.** The flourishing flame blazoned with gold, light blue and royal purple signifies the burning zeal of the three missions of education--teaching, research and service. The hands hold the spiritual, social and intellectual flame of education.
College of Engineering. As the triangles collaborate alongside each other, projecting a diamond shape, they depict the strong relationship between the diverse engineering disciplines. The use of mathematics, science and technology provide the foundation of solving today’s challenging ideas between and within each engineering department. The center illustrates a circuit board to express the continuing growth in technology and engineering today, resulting in new industries and opportunities. The cohesive elements of this design work together as a whole symbolizing communication, interaction, teamwork, and balance in Engineering as the green, blue and navy color palette represents energy, loyalty, wisdom, professionalism and ambition.

College of Geosciences. The white field reveals a yellow sun representing our surrounding atmosphere. The mountain peaks and the horizontal band of golden land represent the lithosphere. The banded waves of white signify the hydrosphere. The atmosphere, lithosphere and hydrosphere form the total environment for life in our world.

Bush School of Government and Public Service. The star symbolizes pride and heritage in our great state of Texas. The two lines on either side of the star represent our connection with the past, and with the future, in an effort to build on experiences from history, while contributing and presenting new opportunities to future generations.

College of Liberal Arts. The golden torch symbolizes the various disciplines lighting the path to our goal, “Knowledge for Life.” The circle of blue, the traditional color of knowledge, represents the college’s unending, unbroken commitment to scholarship, learning, and responsible citizenship.

School of Law. With its emphasis on peace, the olive leaves embody one of the most important tenets of the successful practice of law. Rounding inward, the leaves also echo that most meaningful symbol of the Aggie Ring - a unifying and unending circle of camaraderie and fellowship. The Lady Justice symbolizes the attributes our graduates have mastered as they enter their legal careers. Through the principles of strength (sword), fairness (scale), and objectivity (blindfold), Aggie Lawyers are prepared to represent our University honorably. With a nod to Texas A&M’s Core Values, the six stars acknowledge the attributes of Respect, Leadership, Loyalty, Excellence, Selfless Service, and Integrity, characteristics that define each one of our graduates.

College of Medicine. The white field provides a background for the Aesculapian staff and serpent, long used as the symbol of the healing arts. The green color is the same displayed on the hoods and robes worn for the degree of Doctor of Medicine.
College of Nursing. The stars on the College of Nursing gonfalon represent caring, innovation and empowerment, while the cross symbolizes the origins of nursing. The candle honors the founder of nursing, Florence Nightingale. Apricot is the color of nursing.

School of Public Health. The anchor and caduceus are adapted from the national Public Health Service, which evolved from the Marine Hospital Service to the Public Health and Marine Hospital Service, and finally became the U.S. Public Health Service. The star represents the linkage of the School of Public Health with the Texas A&M Health Science Center and the State of Texas. The salmon color is the color of the public health hoods.

College of Science. This symbol’s segments represent the five departments of the College of Science—Biology, Chemistry, Mathematics, Physics and Astronomy, and Statistics. The interweaving of each depicts their close relationship to each other. The inner quilting represents the intellectual search in science and its continuing growth.

College of Veterinary Medicine and Biomedical Sciences. Resting upon a ground of purity, a white snake stands for the science and the art of prevention, cure or alleviation of disease and injury to animals. It is found entwined around a herald’s green staff—the symbol of service. The golden radiant triangle atop the Aesculapius illustrates the breadth of veterinary medical science.
“The Spirit of Aggieland”

By Mimms-Dunn

Some may boast of prowess’ bold,
Of the school they think so grand,
But there’s a spirit can ne’er be told,
It’s the spirit of Aggieland.

Chorus

We are the Aggies—the Aggies are we,
True to each other as Aggies can be.
We’ve got to fight, boys,
We’ve got to fight!
We’ve got to fight for Maroon and White.
After they’ve boosted all the rest,
They will come and join the best,
For we are the Aggies—the Aggies so true,
We’re from Texas A M U.
Congratulations New Graduates! Welcome to The Association of Former Students!

Today, as a proud graduate of Texas A&M University, graduates will turn their Aggie Rings so that the Class year faces away from the body symbolizing a readiness to face the world.

Being an Aggie lasts a lifetime! It is a life-long experience that is supported by the Aggie Network. By staying involved with Texas A&M through The Association of Former Students, together, we will continue the work of passing back the core values, traditions and experiences that make Texas A&M unique.

As you begin your new journey, we ask that when you’re ready, you consider helping to pass it back to future generations. Join the Century Club at a 50% discount and proudly showcase your very own Century Club Member decal.

The Association of Former Students is HERE for Aggies during their days as students and former students, THERE for Aggies as they take their way around the world and EVERYWHERE that the Aggie Network needs us to be.
